## PREMIER SUPERCOURT® X3: THE OFFICIAL PREMIER PADEL SURFACE IS READY TO WELCOME ATHLETES TO THE ROME STAGE

The world's most important professional padel circuit, Premier Padel, is coming to Italy with the BNL Italy Major Premier Padel scheduled from June 8 to 15 at the Foro Italico. The Italian capital will host the tournament's top players who will compete on the new synthetic turf padel surface, **Premier Supercourt® X3**, provided by the Italian company Mondo. The stadium will be equipped with 10 courts featuring this revolutionary playing surface.

The company will be the **Official Supplier** of the event.

### PREMIER SUPERCOURT® X3: THE SURFACE THAT MAKES YOUR GAME SHINE, SHOT AFTER SHOT

The Rome stage had already been able to appreciate the qualities of the Premier Supercourt® X3 turf in last year's edition; this year the organizing committee specifically wanted the same product.

**Premier Supercourt® X3** is the first synthetic turf for padel that combines three different textured filaments (XNOVA, XOMEGA, and XDELTA). This innovative technology ensures better abrasion control, uniform bounce across the surface, and a remarkable aesthetic impact.

Key advantages of Premier Supercourt® X3 include:

- Excellent adaptability to play: Players enjoy a sense of absolute security and confidence in their movements, with a reduced risk of injury.
- Improved shock absorption
- Optimal stability, traction, and balance: For more precise and dynamic play.
- Superior durability: Tested in rigorous stress tests, this artificial turf boasts greater elastic memory capacity thanks to the different heights and morphologies of the filaments.
- Reduced wear: The textured filaments, acting like small springs, minimize wear and enhance the field's appearance.

Thanks to its intrinsic qualities, the product has been chosen as the **Official Turf by the International Padel Federation**. Luigi Carraro, president of the International Padel Federation, recently confirmed: *"Mondo is a leading company in the sports flooring sector and will enable us to elevate the level of FIP competitions, bringing padel to a new dimension within an ongoing innovative process aimed at both improving the sports product and ensuring maximum athlete safety."*

Maurizio Stroppiana, VP Sport Mondo Group, stated: *"We are proud that the organization of the Rome stage of the Premier Padel circuit has once again wanted our Premier Supercourt X3 turf systems, this is a confirmation of our company's commitment to continuous improvement, supported*

#### **MONDO: an overview**

Mondo, a leading company in the global market for flooring, sports equipment, and toys, is a family business founded in Alba, Italy, in 1948. The group holds a leadership position in various sectors, including the production of sports flooring and equipment with Mondo Sport&Flooring, flooring for contract and transportation with Artigo, and the manufacture of balls and children's toys with Mondo Toys. Mondo Sport&Flooring stands out as a key player in the global sports market, specializing in the creation of prefabricated flooring and custom sports equipment for various applications, ranging from athletics tracks to synthetic turf for padel and football, to wooden gym floors for basketball and cutting-edge flooring for fitness facilities. With installations in over 196 countries, the company has established itself as a trusted supplier worldwide. Since 1987, Mondo has been proud to be the official supplier of World Athletics, solidifying its reputation as a leading provider of athletics tracks. The company has contributed to the success of 13 consecutive Olympic Games including Paris 2024. Mondo remains committed to producing eco-sustainable and recyclable products at the end of their lifecycle, ensuring athletes can perform at their best while minimizing environmental impact.
